

States (Values)

States (values) of processes

All possible states of objects of **Process** type are listed in the table.

| Object status | Meaning |
|---------------|---|
| Run | Process is running. |
| Crash* | Process is crashed (incorrect termination). |
| Stop | Process run was correctly terminated. |
| WDErr* | Error during the communication with process D2000 Server - Watch Dog Error (interrupted flow of Watch Dog messages between process and D2000 Server). |

*If the option **Autostart** is checked in the configuration of object of [Process](#) type, [D2000 Server](#) is attempting to restart process.
