

IF GOTO

IF GOTO action

Function

Conditional jump.

Declaration

```
IF expression GOTO label
```

Parameters

expression	in	Expression of BOOL type.
label	in	Label.

Description

If `expression` returns the value True, there is to be performed the jump to the given label. If returns the value False, the event execution continues with the next action that follows IF GOTO.

If the expression gains an invalid value, the action generates the error `_ERR_EXPRESSION_STATUS`.
