

# Ew

## %Ew function

---

**Old name**

%EwR

**Function**

The function returns the water enthalpy [kJ/kg].  
The result is a real value.

**Declaration**

```
REAL %Ew(  
    REAL in p,  
    REAL in t  
)
```

**Parameters**

<b>p</b>	Relative water pressure (related to the atmospheric pressure) [MPa].
<b>t</b>	Water temperature [°C].
