

# Graphic Alarm Symbols (Work with D2000 HI)

## Graphic alarm symbols

A graphic symbol that displays a state of alarm is placed left from the name of the alarm in the **Name** column.

A description of all the graphic symbols that express alarm states are presented in the following table.

Symbol	Alarm state
	Normal state
	Acknowledged state
	Unacknowledged state
	Alarm state
	Blocked state
	Unknown state

An unknown state occurs only when the [D2000 Alarm](#) process is not running.
