

Edit the Report Parameters (Work with D2000 HI)

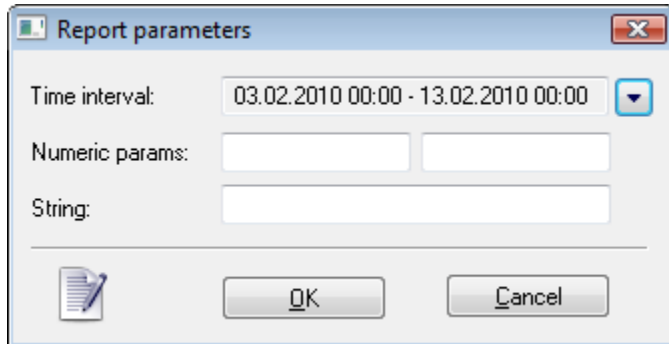

Editing the report parameters

Warning: Since the version D2000 V10.037, the object **Reports** is not supported and the access to it is removed in the D2000 HI environment.

The report parameters include one text string, two numeric values and time period. Interpretation of the parameters depends only on the output information implementation – you can use from none up to all the parameters.

To set the report parameters

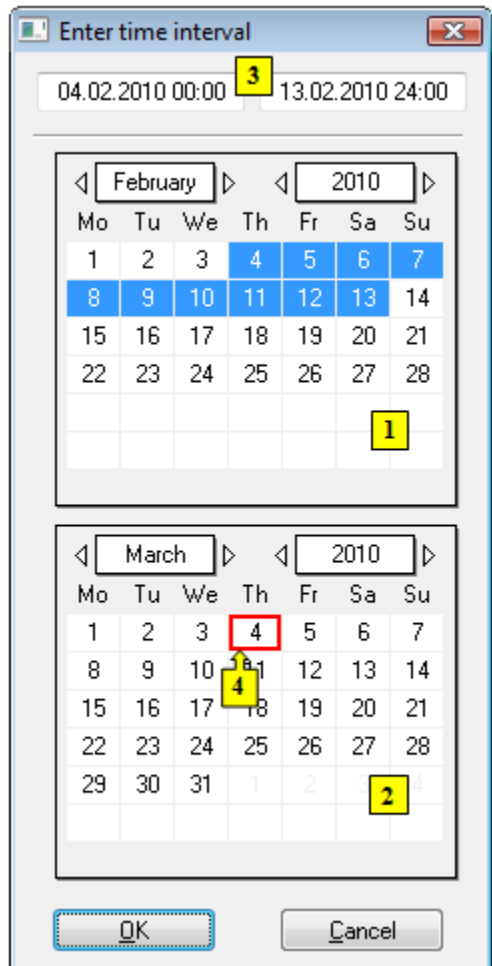

1. Right-click on the opened report area.
2. Select the **Parameters** item from the opened popup menu.
3. Set the report parameters in the open **Report Parameters** dialog box.

The 'Report parameters' dialog box contains the following fields and controls:

- Time interval:** A text field showing '03.02.2010 00:00 - 13.02.2010 00:00' with a dropdown arrow button to its right.
- Numeric params:** Two empty text input fields.
- String:** One empty text input field.
- Buttons:** 'OK' and 'Cancel' buttons at the bottom right, and a document icon button at the bottom left.

The **Time interval** item displays the time period defined for given report. This interval is set in the special dialog box opened after clicking the arrow button placed right from the item.

The 'Enter time interval' dialog box is used to select a date range. It features two calendar views and a date range input field at the top.

Date Range Input: The top section shows a date range from '04.02.2010 00:00' to '13.02.2010 24:00'. A yellow box with the number '3' highlights the end date field.

Calendar 1 (February 2010): The first calendar shows February 2010. A yellow box with the number '1' highlights the date 1st.

Calendar 2 (March 2010): The second calendar shows March 2010. A red box highlights the date 4th, and a yellow box with the number '4' highlights the date 10th. A yellow box with the number '2' highlights the date 2nd.

Buttons: 'OK' and 'Cancel' buttons are located at the bottom.

In the dialog box, define the begin and end time of the report interval as follows:

1. In the calendar (1), select the required month and year of the time interval beginning (click the items showing year and month). The red item (4) shows the current date.
2. In the calendar (2) select the required month and year of the time interval end.
3. In the calendar (1) click a day - the time interval beginning and hold down the mouse button.
4. In the calendar (2) click a day - the time interval end and release the mouse button.
5. Time interval may be also defined in the input fields (3) showing required time parameters (3).
6. To confirm your settings click the **OK** button.

Note:

Time interval within one month can be defined in one of the calendars.

Effect of a time period change in displayed report depends on the configuration of the report.
