

# EXCEPTION HANDLER

## EXCEPTION HANDLER action

Function	Action defines a start of actions that handle an error (so-called exception handler) and defines an area of their operation.
Declaration	EXCEPTION_HANDLER
Description	<p><b>EXCEPTION_HANDLER</b> action defines the start of actions that handle the error (so called exception handler) and defines the area of their operation.</p> <p>According to the context where the action is used, it can cause:</p> <ul style="list-style-type: none"><li>• End of script execution - if the action is used out of the procedure.</li><li>• End of procedure execution - if the action is used within the procedure.</li></ul> <p>If <b>EXCEPTION_HANDLER</b> action is in some procedure the exception handling ends on this action and starts either by previous <b>EXCEPTION_HANDLER</b> action or by the procedure.</p> <p>If <b>EXCEPTION_HANDLER</b> action is out of procedure it defines the exception handler for errors occurring in the actions of an initialization part of script and initialization of the global variables.</p> <p><b>EXCEPTION_HANDLER</b> action must not define the error handler for ON ERROR action.</p> <p>For example:</p> <pre>PROCEDURE Proc2 ; incorrect placement of the command ON ERROR Error  INT _i CALL Proc1 Error:  EXCEPTION_HANDLER ; exception handling from the start of procedure to EXCEPTION_HANDLER action END Proc2</pre>
	When <b>EXCEPTION_HANDLER</b> action is executed, it is interpreted as <b>RETURN</b> action. The following two procedures are the same:
	<pre>PROCEDURE Proc1 ; actions ; .....  RETURN EXCEPTION_HANDLER ; exception handling END Proc1</pre>
	or
	<pre>PROCEDURE Proc1 ; actions ; .....  EXCEPTION_HANDLER ; exception handling END Proc1</pre>
	<b>EXCEPTION_HANDLER</b> action may handle the exceptions which occur while there are serviced:

```
PROCEDURE Proc3
; actions
; ...

EXCEPTION_HANDLER
; exception handling from start of procedure to EXCEPTION_HANDLER action

EXCEPTION_HANDLER
; exception handling from the previous EXCEPTION_HANDLER action

END Proc3
```
