

HI_HideLine

%HI_HideLine function

Function

The function **%HI_HideLine** allows to hide the graphic flow in the displayer of [Graph](#) or [XY Graph](#) types ([Control function](#)).

Declaration

```
%HI_HideLine(  
    INT in refId,  
    INT in index  
)
```

Parameters

refId	Reference to displayer (reference variable).
index	Serial number of the graphic flow.

Description

The graph must be placed in the picture, where the parameter *refId* is the reference variable of the graph. The parameter *index* determines the serial number of the graphic flow (numbering from 1).

WARNING:

If the graphic flow is hidden by using the function **HI_HideLine**, new data from the archive or script will show it. The feature can be eliminated by using the function [HI_ShowLine](#).
