HI_SetFontCharSetRE

%HI_GetFontCharSetRE, %HI_SetFontCharSetRE functions

Function

The function **%HI_SetFontCharSetRE** sets a character set to selected text in the graphic object Text entry field of **RichEdit** type (control function).

The function **%HI_GetFontCharSetRE** retrieves the character set of selected text in the graphic object Text entry field of **RichEdit** type.

Declaration

```
%HI_SetFontCharSetRE(
   INT in refId,
   INT in fontCharSet
 )

 INT %HI_GetFontCharSetRE(
   INT in refId
 )
```

Parameters

refId	Reference to graphic object Text entry field of **RichEdit** type (reference variable).
fontCharSet	Character set of the selected text in the graphic object Text entry field of **RichEdit** type.

Note

The character sets includes utf-8, windows-1250, etc.
More information, including the constants, you can find on http://msdn.microsoft.com/en-us/library/ms531361%28VS.85%29.aspx.
