TimeSynchroStation

Declaration

unsigned int _stdcall TimeSynchroStation(struct StationPar * St)

Parameters

St Pointer to StationPar structure.

Description

The function **TimeSynchroStation** (_TimeSynchroStation@4 in the Stdcall calling convention) is optional. It is called (or not called) according to the station polling parameter "Period". The task of the function is to synchronize the real time of the device.

Return code

Code	Description
RQ_OK	The request has been executed.
RQ_E RR	An error occurred (the device does not communicate or is out of service, or there is any error), the station changes into the status COM_ERR or HARD_ERR after returning from the function.
RQ_I GNO RED	The function was ignored and the station status is not changed.
