# Configuration of Compositions, Graphs and Reports (HI)

Configuration of composition and graphs
Access to the **Configuration** menu is possible in the **Open/Composition, Graphs** offer, or click the buttons ![icon] ![icon] in the Main toolbar (or press CTRL+Q, CTRL+T).

Open	Window	Help	
	Compositions...		Ctrl+Q
	Pictures...		Ctrl+O
	Graphs...		Ctrl+G

After selecting an item (Compositions or Graphs) from the menu, the following submenu appears:

From the list on left side select Composition or Graph (these are preset according to the selected item in Open/Composition, Graphs offer) and then, on the right side, choose required composition or graph by clicking on its name.

By pressing the buttons ![icons] we choose required configuration actions for the particular Composition of Graph.

The icons in the buttons depend on the type of action:

⊕	Creates new object.
✎	Changes the object parameters.
🗑	Deletes the object.

	Classifies the objects into logic groups.
	Confirmation of selection for opening the object.
	Display/hide the filter/list for sorting objects in the left part of the dialog window.
	Deletes the entered text in the filter. The button is active only if text is written in the filter.
