# Interval for Logging the System

Interval for logging the system

In case that no predefined time period is suitable to log the system event (last hour, last 8 hours, etc.), user can define his/her own interval.

To set an user defined time interval

1. Select the **Exactly** radio button in the System Logging - Settings dialog box.
2. The following dialog box allowing the user to define a time interval is opened.

3. In the calendar (**1**), select the required month and year of the time interval beginning (click the items showing year and month). The red item (**4**) shows the current date.
4. In the calendar (**2**) select the required month and year of the time interval end.
5. In the calendar (**1**) click a day - the time interval beginning and hold down the mouse button.
6. In the calendar (**2**) click a day - the time interval end and release the mouse button.
7. Time interval may be also defined in the input fields (**3**) showing required time parameters (**3**).
8. To confirm your settings click the **OK** button.

Note:
Time interval within one month can be defined in one of the calendars.
