

HI_Value_To_Clipboard

%HI_Value_To_Clipboard function

Function

Function copies a value to clipboard.

Declaration

```
%HI_Value_To_Clipboard(  
    UNIVAL in value,  
    BOOL   in formatByNLS := @FALSE  
)
```

Parameters

value	Data type to be copied (TEXT, INT, REAL, TIME, BOOL).
formatByNLS	Optional parameter. Possible values: <ul style="list-style-type: none">• @TRUE - values of <i>Absolute time</i> and <i>Real</i> are to be formatted according to the settings in Regional and Language Options of the current user,• @FALSE - values are to be formatted according to default settings of D2000 (see EXPORT_CSV).

Description

The function converts value of data type to text which will be sent to clipboard.

Note

The function copies elementary data type (TEXT, INT, REAL, TIME, BOOL).

Example

```
TEXT _text  
  
_text := "Value of _text"  
  
; copy to Clipboard  
%HI_Value_To_Clipboard(_text)
```
