Insert DDE reference

Insert a DDE reference

1. Click on **List of objects** in **D2000** menu. A dialog window opens that contains the list of D2000 objects classified into types.
2. Choose a particular object from the list.
3. Choose a type of DDE reference depending on what type of information you want to get.
4. Press **OK**.
5. Depending on version of MS Excel, DDE reference or object name is inserted to:
    * clipboard – MS Excel 97. Paste the clipboard contents to the cell by pressing CTRL+V,
    * particular cell – MS Excel 7.0.

Note

* To insert the correct DDE reference to the cell in workbook, you must enter the character "=" in front of the reference. You can do this manually or by selecting the item **Create reference** in **D2000** menu.
