

LST_GO_PREV

LST_GO_PREV action

Function Action passes onto the previous page in the list of objects.

Declaration

```
LST_GO_PREV h, data
```

Parameters

h	in	Identifier of the <i>Int</i> type - unique handle on created list of objects.
data	output	Identifier of the entire structure - the structure must consist of 7 or 9 columns, as defined in S D_System_ObjectInfo .

Description

Action passes onto the previous page in list of objects.

If entered handle on list does not exist, event generates an error **ERR_NO_DATA**. If action is executed on the first page, it gets back zero number of rows to output parameter **data** because previous page does not exist.

Example

[Work with list of objects \(LST... actions\)](#).
