

HI_EnableControls

%HI_EnableControls function

Function

The function enables/disables the execution of actions or calling picture events that are reactions to the user activity above graphic objects in the active picture ([control function](#)).

Declaration

```
%HI_EnableControls(  
    BOOL in bEnable  
)
```

Parameters

bEnable	@TRUE - enables the execution of actions or calling picture events. @FALSE - disables the execution of actions or calling picture events.
----------------	--

Note

This function is available also in [%HIX_version](#).
