

LocalToMonoTime

%LocalToMonoTime function

Function

The function returns a value of *Absolute time* type. In daylight-saving time, one hour is subtracted from the specified time (if the DST offset is 1 hour). Otherwise (if daylight-saving is not active), the result time is the same as the specified time.

Declaration

```
TIME %LocalToMonoTime(  
    TIME in Time  
)
```

Parameters

Time	Function argument.
