

ReplaceStr

%ReplaceStr function

Function

The function replaces one substring by other one in the input string.

Declaration

```
TEXT %ReplaceStr(  
    TEXT in text,  
    TEXT in sub1,  
    TEXT in sub2,  
    BOOL in ReplaceAll  
)
```

Parameters

text	Text.
sub1	String that to be replaced by a new one.
sub2	String that replaces the previous one.
timeA	@TRUE - replace all occurrence of <i>sub1</i> . @FALSE - replace the first occurrence from the left only.

Example

```
%ReplaceStr("Name : % or %", "%", "John", @FALSE)    ; returns text: "Name :  
John or %"  
  
%ReplaceStr("Name : % or %", "%", "John", @TRUE)     ; returns text: "Name :  
John or John"
```
