```

```

-----*****-----
-- parametre gr.objektov - param's types constants
-----*****-----

-- implementacne poznamky
-- 1. aby boli parametre akceptovane, musia by v procedurach takych typov ako
--    su v poznamke za parametrom
-- 2. nie vsetky parametre su realizovane
-- 3. možno zada max.1000 pozicnych bodov, ale V4.5 pozna max.prvych 1+30
--    pri väšom pote bodov pre typ polyline sa generuje viacero objektov tohto typu
-- 4. index farby pre import index do default farebnej palety
-- 5. farba RGB od ver V5.0 farby plnia 128 prvkova tabulku z ktorej bude vytvoreny
--    objet paleta, farby v objekte budu ukladane ako indexy do tejto tabulky
-----*****-----

----- positions and sizes

cPosXY      : constant :=1; -- 2 * int/float - pozicia bodu
cPosDXY     : constant :=2; -- 2 * int/float - vzdialenosť bodu od predosleho bodu

----- line params

cLineColorRGB   : constant :=10; -- int - RGB farba objektu - od ver V5.0
cLineColorIdx   : constant :=11; -- int - index farby v lokalnej palete
cLineStyle      : constant :=12; -- int - styl ciary - lineStyles
cLineWidth       : constant :=13; -- int - hrubka ciary 1..
cLineEnd        : constant :=14; -- int - zakoncenie hrubej ciary - lineEnd
cLineJoin       : constant :=15; -- int - zalomenie polyline ciary - lineJoin

----- fill params

cFillColorRGB   : constant :=30; -- int - RGB farba objektu - od ver V5.0
cFillColorIdx   : constant :=31; -- int - index farby v lokalnej palete
cFillPattern     : constant :=32; -- int - styl ciary - brushStyle

----- circles

cCircleRadial    : constant :=50; -- int/float - polomer kruhu
--
cCircleAngleDegStart : constant :=56; -- int/float - degree
cCircleAngleDegEnd   : constant :=57; -- int/float - degree
