View values from XY graph in table (Work with D2000 HI)

Viewing values from XY graph in table

Values of a graphic flow displayed in the XY graph window can be also shown in table form. The table shows a sequence of values in a text (numerical) form.

To show values from the XY graph window in the table:

- 1. Right-clicking on the required flow in the table located in the bottom part of the XY graph window.
- 2. The following menu is to be opened.

Display table
Change axis range
Highlight the line

- 3. Choose **Display table ...** from the menu.
- 4. The table containing values of given graphic flow is to be opened.

💷 D.GraphXY 4 📃 📼 💌						
F	D.GraphXY 4					
Settings:			📝 Min.	🔽 Max		
N	Value X		Value Y			
1	1		1			
2	2		8			
3	5		1			
4	7		1			
5	3		1			
_						
Minimum: 1				4		
Maximum: 2 8 1						
				<u>C</u> ancel		

You can sort the values downwardly or upwardly by clicking on the header of column in table. Clicking on header of column *Nr*. sorts the values according to arrival of the values into table. Clicking on header *Value X / Value Y* sorts the values according to X value / Y value.
