

# Sequence of DDE references

If you want to insert the sequence of [DDE references](#), which differ in the consecutive number of archive value, into a workbook, you can use the following steps.

1. Enter DDE reference without "=" into a cell. Use the lowest consecutive number of value. For example:

```
D_2000|ARCH_VALUE!WB1_Blok2_1
```

1. Move a mouse pointer on the right bottom corner of the cell, which contains DDE reference.
2. When changing the pointer, hold down the left-mouse button and drag as necessary into required direction.
3. Release the button.
4. Keep the selection and click on the **Create reference in D2000** menu. The character "=" will be inserted in front of all DDE references. These DDE references represent the requirements for sequence of archive block values, for example:

```
=D_2000|ARCH_VALUE!WB1_Blok2_1  
=D_2000|ARCH_VALUE!WB1_Blok2_2  
=D_2000|ARCH_VALUE!WB1_Blok2_3  
=D_2000|ARCH_VALUE!WB1_Blok2_4  
=D_2000|ARCH_VALUE!WB1_Blok2_5
```
