

Old Control Windows (Work with D2000 HI)

Old control windows

Use of the old appearance of control windows is allowed by the option [Old control windows](#) in the **Console preferences** (or **User preferences**) dialog box. Individual types of control windows are described in the following topics:

- [Common properties of control windows](#)
- [Information Window](#)
- [Information Window of Historical Value Array](#)
- [Controlling Digital Input I/O Tags \(DI\)](#)
- [Controlling Digital Output I/O Tags \(DO\)](#)
- [Controlling Quadrat Input I/O Tags \(QI\)](#)
- [Controlling Analog and Integer Inputs \(AI, CI\)](#)
- [Controlling Analog and Integer Outputs \(AO, CO\)](#)
- [Controlling Communication Stations](#)
- [Controlling Absolute Time Inputs \(TiA\)](#)
- [Controlling Absolute Time Outputs \(ToA\)](#)
- [Controlling Time Interval Objects - Input \(TiR\)](#)
- [Controlling Time Interval Objects - Output \(ToR\)](#)
- [Controlling Text objects](#)
- [Controlling Text Inputs \(TxtI\)](#)
- [Controlling Text Outputs \(TxtO\)](#)

and in the chapter [Controlling process alarms by means of the object control window](#).
