D2000 WorkBook

The extension **D2000 WorkBook** is designed for creating reports, which contains archive or current values of D2000 system objects in the environment **MS Excel 97** (or **MS Excel 2000**). Created reports can be used either directly in the environment MS Excel or can be integrated into the D2000 HI environment by means of object of *Report* type. It is also possible to configure an automatic report or data print.

D2000 WorkBook consists of its own extension (the file D2000_WorkBook.xll) and the template (D2000_WorkBook.xlt).
