

# IsArchStart

## IsArchStart function

---

### Functions

The function returns TRUE, if the particular value (N-th in order) from an archive block **bName** has been written into the archive database during the time when **D2000 Archiv** was starting. If not, the function returns FALSE.

### Declaration

```
IsArchStart(DDEreference)
```

### Parameters

DDEReference	DDE reference in the format D_2000 ARCH_STATUS!bName_N or cell address, which contains the reference.
--------------	---

### Example

```
= IsArchStart(D_2000|ARCH_STATUS!!WB1_Blok2_10)
```
