

# IsArchBlock

## Function

The function returns TRUE, if the particular value (**N**-th in order) from an archive block **blname** has been written into the archive database during the time when the archiving was disabled - by Stop condition. If not, it returns FALSE.

## Declaration

```
IsArchBlock(DDEreference)
```

## Parameters

DDEreference	DDE reference in the format <a href="#">D_2000 ARCH_STATUS!blname_N</a> or cell address, which contains the reference.
--------------	------------------------------------------------------------------------------------------------------------------------

## Example

```
= IsArchBlock(D_2000|ARCH_STATUS!!WB1_Blok2_10)
```
