

# Reconnecting a picture

!!! WARNING: Process D2000 SysEdit is not supported from Version 7.2 and later !!!

Process D2000 SysEdit allows reconnecting objects which are connected to a picture.

Selecting the item **Picture reconnecting** from the menu **Tools** opens the following dialog box.

Picture:

In link names:  
Find what  ☒ Forward ☐ Backward  
Replace with

In structure:  
   
Replace row  with

OldName	NewName
SV.20ST[19]^ST_CIEL2	SV.20ST[20]^ST_CIEL2
SV.20ST[19]^TEX_NEVYVAZENY	SV.20ST[20]^TEX_NEVYVAZENY
SV.20ST[19]^TEX_DELTA	SV.20ST[20]^TEX_DELTA
SV.20ST[19]^TEX_AVG	SV.20ST[20]^TEX_AVG
SV.20ST[19]^NAV_SORT_INTC	SV.20ST[20]^NAV_SORT_INTC
SV.20ST[19]^CHOD	SV.20ST[20]^CHOD
SV.20_OvL_TZH[19]^T_CompSP

S.Celk_pohlad	
S.DS370_PARMS	

## Picture

Name of the picture, whose objects you want to reconnect. Clicking the button next to the input field opens a list of pictures. After selecting a picture, a list of objects connected to the picture is shown in the right part of the dialog box (the column **OldName**).

## Find what

A text string, you want to replace.

## Replace with

A text string, that replaces the string entered in the item **Find what**. After entering a text string, define one of the searching methods - **Backward** (searching from the beginning of the list) or **Descending** (searching from the end of the list). To execute performed changes press the button **Set**.

## In structure

Selection of a structure, in which you want to replace rows.

## Replace row

Definition of a structure row, that will be replaced by a row defined by the parameter **With**.

## Apply

Perform all changes in the picture.

## Close

Cancel reconnecting the picture.
