

Synchronization (Bitmaps)

Synchronization of bitmaps

Synchronization of bitmaps and graphic files of the formats JPEG and TIFF provides the unification of the local directories **Bitmaps** on user consoles (processes [D2000 HI](#)) according to the directory **Bitmaps**, which is placed in [the application directory](#). To run the synchronization, select the item **Update of bitmaps** from the menu **Utils** in the process [D2000 GrEditor](#).
