OnDragMove

OnDragMove picture event

Declaration

```
 ENTRY OnDragMove(IN INT _refId, IN INT _moveType, IN INT _x, IN INT _y,
IN BOOL _User)
 ; actions
```

```
 END OnDragMove
```

Parameters

_refId	Reference variable of object.
_moveType	Direction of movement.
_x	Movement on X-axis.
_y	Movement on Y-axis.
_User	Auxiliary parameter (for the present only of value @true).

Description

An event is generated if user moves by object in picture. It sends some information about movement range of object on X-axis and Y-axis into script.

Note

```
 ENTRY OnDragMove(IN INT_refId, IN INT _moveType, IN INT _X, IN INT _Y, IN
BOOL _User)
 ; actions
 END OnDragMove
```
