

OnDragLeave

OnDragLeave picture event

Declaration

```
ENTRY OnDragLeave(IN INT _refId)
; action
END OnDragLeave
```

Parameters

_refId	Reference variable of target object.
--------	--

Description

Picture event is generated over a target graphic object when a user finished moving the mouse or aborted [Drag](#) operation (e.g. by ESC key). In term of Drag&Drop functionality, this event does not need a special handling.

Example

```
ENTRY OnDragEnter (IN INT _refID, OUT BOOL _bAllow)
%HI_SetBackColor(_refId, _dndColor)
_bAllow := @TRUE
END OnDragEnter

ENTRY onDragLeave (IN INT _refId)
%HI_SetBackColor(_refId, _baseColor)
END OnDragLeave
```
