

HI_Get_Clipboard_Cols

%HI_Get_Clipboard_Cols function

Function

The function detects the number of rows of the text from the Clipboard. Columns are horizontal tab-separated.

Declaration

```
INT %HI_Get_Clipboard_Cols()
```

Parameters

None.

Example

```
ENTRY IMPORT_OnClick
  INT _rows
  INT _cols
  ; detection of the structure size placed in Clipboard
  _rows := %HI_Get_Clipboard_Rows()
  _cols := %HI_Get_Clipboard_Cols()

  IF _rows=0 | _cols=0 THEN
    ; Clipboard is empty
  ELSE
    ; reading the Clipboard content
    %HI_From_Clipboard(_recFrom^Real, " ")
  ENDIF
END IMPORT_OnClick
```
