HI_SelectDir

%HI_SelectDir function

Function

The function is used to select a directory using the dialog box.

Declaration

```
TEXT %HI_SelectDir(
   TEXT in userDescTxt,
   TEXT in startDirTxt
 )
```

Parameters

userDescTxt	Description.
startDirTxt	Initial (starting) position in directory structure.

Return value

Path to selected directory, or invalid value if the user closes the dialog box without a selection (CANCEL).

Description

The function opens the dialog box to select a directory. It is possible to define an initial position in existing directory structure (the parameter *startDirTxt*) and description (the parameter *userDescTxt*), that is to be displayed in the dialog box.
