OnPictureWindowStateChanged

OnPictureWindowStateChanged event

Declaration

```
ENTRY OnPictureWindowStateChanged(IN INT _newWinState)
; action
END OnPictureWindowStateChanged
```

Parameters

_newWinState	Window picture status: 0 - normal 1 - maximized window 2 - minimized window

Description

The event is generated by the change of picture window status. After opening, the initial status is 0. This status is not sent to a script.
