

OnPopUpMenu_Result

OnPopUpMenu_Result picture event

Declaration

```
ENTRY OnPopUpMenu_Result(IN INT _id)
; script actions
END OnPopUpMenu_Result
```

Parameters

_id	Unique identifier of popup menu item.
-----	---------------------------------------

Description

The picture event is being generated either when the user selects the item from selected popup menu - the parameter *_id* contains the unique identifier of the popup menu item (defined as the parameter *id* of the function [%HI_PopUpMenu_AddItem](#)), or when the menu disappears with no selection - the parameter *_id* is equal to 0.

Example

Easy handler of item selection. The handler is a continuation of the example of the function [%HI_PopUpMenu_AddItem](#).

```
ENTRY OnPopUpMenu_Result(IN INT _id)
IF _id = 221 THEN
; the item "Text 2.2.1" is selected
ELSIF _id = .....
```

```
...
ENDIF
END OnPopUpMenu_Result
```
