

HI_GetBrowserMultiselect

%HI_SetBrowserMultiselect, %HI_GetBrowserMultiselect functions

Function

The function **%HI_SetBrowserMultiselect** enables / disables multiple selection in [Browser](#) displayer. The function **%HI_GetBrowserMultiselect** returns the setting defined by %HI_SetBrowserMultiselect function in [Browser](#) displayer.

Declaration

```
%HI_SetBrowserMultiselect(  
    INT in refId,  
    BOOL in bEnable  
)  
  
HBJ %HI_GetBrowserMultiselect(  
    INT in refId  
)
```

Parameters

refId	Reference to displayer (reference variable).
bEnable	@TRUE - enables the multiple selection @FALSE - disables the multiple selection

Example

```
; multiple selection is disabled in Browser displayer  
%HI_SetBrowserMultiselect(_Browser, @FALSE)
```

```
; getting of status of multiple selection (enabled / disabled) in Browser  
displayer  
_bMultiSelect := %HI_GetBrowserMultiselect(_Browser)
```
