HI_GetBackColor2 (Graphic Object Manipulation Functions)

%HI_GetBackColor2, %HI_SetBackColor2 functions

Function

The function **%HI_SetBackColor2** sets a 2nd gradient color for the graphic object or picture (control function).

The function **%HI_GetBackColor2** gets RGB of the 2nd gradient color for the specified graphic object or picture.

Declaration

```
%HI_SetBackColor2(
   INT in refId,
   INT in color
 )

 INT %HI_GetBackColor2(
   INT in refId
 )
```

Parameters

refId	Reference to graphic object (reference variable) or picture (if *RefId*=0).
color	RGB index of color.

Note

The functions use a color, that is expressed by RGB index. RGB index is a integer number, that express the color representation of the color components - red (R), green (G) and blue (B) in the result color.

The function %MakeRGB allows to create the color from individual color components.
