HI_LVQueryDnDItem

%HI_LVQueryDnDItem function

Function

Function **%HI_LVQueryDnDItem** returns position where the new values are to be placed, which are obtained by Drop operation.

Declaration

```
%HI_LVQueryDnDItem(
   INT in refId,
   OUT in row1,
   OUT in col1,
   OUT in row2,
   OUT in col2,
 )
```

Parameters

refId	Identifier of Browser displayer.
row1	Index of row top left.
col1	Index of column top left.
row2	Index of row bottom right.
col2	Index of column bottom right.

Return value

BOOL – if the value is @TRUE, the function got the position for Drag&Drop, otherwise the values of "out" parameters are undefined.
