

HI_ReportNumPar

%HI_ReportNumPar function

Function

The function **%HI_ReportNumPar** sets the numeric parameters of the displayer of Report type ([Control function](#)).

Declaration

```
%HI_ReportNumPar(  
    INT in refId,  
    INT in param1,  
    INT in param2  
)
```

Parameters

refId	Reference to graphic object (reference variable).
param1	First numeric parameter.
param2	Second numeric parameter.

Description

The function sets two integer parameters of the report defined by the reference variable *refId*.

Note

The report parameters can be also defined by right-clicking the report and select the item **Parameters**. In the displayed dialog box set required values and click the button **OK**.

For detailed description of the report parameters see the topics [D2000 WorkBook](#), [CrystalReport](#).
