

# LST\_GO\_FIRST

## LST\_GO\_FIRST action

**Function** Action passes on first page in list of objects.

**Declaration**

```
LST_GO_FIRST h, data
```

**Parameters**

|      |        |  |
|------|--------|--|
| h    | in     | <a href="#">Identifier</a> of <i>Int</i> type - unique handle on created list of objects.  |
| data | output | <a href="#">Identifier of entire structure</a> - the structure must consist of 7 or 9 columns, as defined in <a href="#">SD</a> . <a href="#">_System_ObjectInfo</a> . |

**Description**

Action passes on first page in list of objects.  
If entered handle on list does not exist, event generates an error **ERR\_NO\_DATA**. If list does not contain any objects, action gets back zero number of rows to output parameter **data**.

**Example**

[Work with list of objects \(LST... actions\)](#).
