

LST_GO_PAGE

LST_GO_PAGE action

Function Action passes on the first page in list of objects according to its sequential number.

Declaration

```
LST_GO_PAGE h, data, pgNr
```

Parameters

h	in	Identifier of <i>Int</i> type - unique handle on created list of objects.
data	output	Identifier of entire structure - the structure must consist of 7 or 9 columns, as defined in SD. _System_ObjectInfo .
pg Nr	in	Identifier of <i>Int</i> type - sequential number of required page.

Description

Action passes on the first page in list of objects according to its sequential number. If entered handle on list does not exist, event generates an error **ERR_NO_DATA**. If required page does not exist, it gets back zero number of rows to output parameter **data**.

Example

[Work with list of objects \(LST... actions\)](#).
