

XML_FreeDocument

%XML_FreeDocument function

Function

The function releases the XML document from the memory.

Declaration

```
BOOL %XML_FreeDocument(  
    INT in document  
)
```

Parameters

document	Handle to XML document.
-----------------	-------------------------

Return value

@TRUE - document released, @FALSE - cannot release the document.

Description

Having finished work with a XML document, it is necessary to release it from the memory using the function. At the same time, all handles connected to the document are invalid.

Example

```
BOOL _ok  
_ok := %XML_FreeDocument(_doc)
```
