Select Alarms in the List

Selecting alarms in the Alarm list

Each alarm is selected from the list by mouse clicking the alarm name. To execute operation for a selection of alarms you must select these alarms first. You can select a continuous or a discontinuous selection of alarms.

To select a continuous selection of alarms

1. Click the first alarm of the selection.
2. Press and hold down the **Shift** key.
3. Click the last alarm of the selection.

To select an discontinuous selection of alarms

1. Press and hold down the **Ctrl** key.
2. Click the alarm names you want to add into the selection.

Note

- To select all alarm in the list press the CTRL+A shortcut.
