

Create a New Object Group

Creating a new object group

To create a new object group, use the following procedure:

1. Open the [selection window](#) in the processes [D2000 CNF](#).
2. Select the type  **Object Group** in the list of objects.
3. Select an object group you want to use as a template.
4. Click the button  **New object**.
5. Enter a name of the new object group in the dialog box [New object](#).
6. Set the parameters of the group in the [configuration dialog box](#).

Note: Points 2 and 3 are optional.
