

CreateThread

Declaration

```
unsigned int (_stdcall * CreateThread)(void * Proc, void * Par);
```

Parameters

Proc	Address of the executive procedure of a new thread. The procedure must be defined as follows: <div><pre>void _stdcall ProtocolThread(void * Par)</pre></div> <p><i>Warning:</i> the <i>Stdcall</i> call convention is required !!!</p>
Par	Pointer to the parameters transferred to a new thread.

Description

The function creates and initializes a new thread.

Return value

ID of the thread.
