

FindEl

FindEl

Declaration

```
void * (_stdcall *FindEl)(LinListH List, void *DataPtr, void *FindProc);
```

Parameters

List	Handle to a linked list.
Data Ptr	Address to the data. The data is to be sent as El1 into the search function.
Find Proc	Search function address. The form of the function is equal to a sort function of the calling InsertEl . The item was found when the search function returns the zero value.

Description

The function searches for an element in linked list.

Return value

The address of the element or NULL if it is unsuccessful.
