# D2000 Java API

D2000 Java API (D2JAPI) interface implements the access to D2000 System from the environment of external Java application and enables to create the independent desktop or web applications in Java SE and Java EE environment. These applications are connected to D2000 System through **D2Connector** via TCP socket.

The documentation and D2JAPI java libraries are a part of D2000 installation and are placed in the installation directory D2000_EXE\java64\lib\d2japi\ (or D2000_EXE\java\lib\d2japi\ for 32-bit installation).
