

Windows Controls

Windows controls

Windows controls are special graphic objects created by using standard controls of the Windows system. Windows controls are basic structural elements of [active pictures](#).

The current version of the process [D2000 GrEditor](#) provides to users these types of windows controls:

	Static text
	Text entry field
	Group box
	Push button
	Tree view
	Check button
	Radio button
	List box
	Spin button
	Tab control
	CommandLink
