DBTable

DBTable class

```
        public void dbDisconnect()

        public void dbDelete(D2SRow row)

        public void dbDelete(String whereStr)

        public void dbInsert(D2SRow row)

        public void dbInsert(D2SD structIdent)

        public void dbsInsertOrUpdate(D2SRow row)

        public void dbRead(D2SRow row)

        public void dbRead(D2SRow row, String whereStr)

        public void dbRead(D2SD localStructIdent, int maxRows_Int)

        public void dbRead(D2SD localStructIdent, int maxRows_Int , String whereStr)

        public void dbReadBlob(String blobColNameIdent_Str, OutputStream blobOutputStream, D2SRow row) throws
ExceptionDBNoData

        public void dbReadBlob(String blobColNameIdent_Str, OutputStream blobOutputStream, String whereStr)

        public void dbUpdate(D2SRow row)

        public void dbUpdate(D2SRow row, String whereStr)

        public void dbUpdateBlob(String blobColNameIdent_Str, InputStream blobInputStream, D2SRow row)

        public void dbUpdateBlob(String blobColNameIdent_Str, InputStream blobInputStream, String whereStr)
```
