

# DBTrans

## DBTrans class

```
public void dbTransCommit()

public void dbTransRollback()

public void dbTransClose()

public DBTable dbConnect(SODBTable dbTable, int accessIdent)

public DBSqlConn sqlConnect(int dbObjIdent)

public DBSqlConn sqlConnect(String connString, int dbManIdent)

public void dbsDelete(SODBTable dbTable, D2SRow row)

public void dbsDelete(SODBTable dbTable, String whereStr)

public void dbsInsert(SODBTable dbTable, D2SRow row)

public void dbsInsert(SODBTable dbTable, D2SD structIdent)

public void dbsInsertOrUpdate(SODBTable dbTable, D2SRow row)

public void dbsRead(SODBTable dbTable, D2SRow row)

public void dbsRead(SODBTable dbTable, D2SRow row, String whereStr)

public void dbsRead(SODBTable dbTable, D2SD localStructIdent, int maxRows_Int)

public void dbsRead(SODBTable dbTable, D2SD localStructIdent, int maxRows_Int, String whereStr)

public void dbsReadBlob(SODBTable dbTable, String blobColNameIdent_Str, OutputStream blobOutputStream,
D2SRow row)

public void dbsReadBlob(SODBTable dbTable, String blobColNameIdent_Str, OutputStream blobOutputStream,
String whereStr)

public void dbsUpdate(SODBTable dbTable, D2SRow row)

public void dbsUpdate(SODBTable dbTable, D2SRow row, String whereStr)

public void dbsUpdateBlob(SODBTable dbTable, String blobColNameIdent_Str, InputStream blobInputStream,
D2SRow row)

public void dbsUpdateBlob(SODBTable dbTable, String blobColNameIdent_Str, InputStream blobInputStream,
String whereStr)
```
