StrToTime

%StrToTime function

Old name

%MkAT

Function

The function converts a text string to an absolute time.

Declaration

```
TIME %StrToTime(
   TEXT in timeString
 )
```

Parameters

timeString	Text in one of the formats below.

Note

The parameter *timeString* must be given in the format **hh:mm:ss DD-MM-YYYY**, where:

hh	**INT**	Hour
mm	**INT**	Minute
ss	**INT**	Second
DD	**INT**	Day
MM	**INT**	Month
YYYY or YY	**INT**	Year

Example

```
%StrToTime("17:03:16 18-03-2005")
```
