StructRowStatSUM

%StructRowStatSUM function

Function

The function calculates the sum of all values of the row of the structured variable.

Declaration

```
REAL %StructRowStatSUM(
       in StructVar[row]^Column,
   INT in num_cols
 )
```

Parameters

StructVar	Structured variable.
Column	Column of the structured variable.
num_cols	Number of columns, which are included in calculation. If the parameter is < 0, then all columns from the column defined by the parameter *Column* will be included in calculation.

Note

The function sets the user values as a sum for resulting value

Example

```
%StructRowStatSUM(SV.Structure^Int, 2)
```
