

CNT_GETKEY

CNT_GETKEY action

Declaration	CNT_GETKEY _hContainer, _index, _key
-------------	--------------------------------------

Parameters

_hContainer	in	Unique identifier of <i>Int</i> type - data container.
_index	in	Consecutive number of an item (from 1...) of array that was created by CNT_CNVTOARRAY .
_key	out	Value of key from a container.

Description	The action reads the value of key of an item from data container, which is defined its consecutive number (parameter <i>_index</i>) and inserts it into the parameter <i>_key</i>. The parameter <i>_key</i> must be the appropriate type. The parameter <i>_index</i> may be a value in the range 1...<i>_nr</i>. Parameter <i>_nr</i> may be acquired by calling CNT_GETNR.
-------------	--

Example	Work with data container (the actions CNT_...) .
